

Turnitin Directions

Turnitin.com is a plagiarism prevention website that Clark Magnet uses. While you will turn in your work in paper form, you will also turn them in electronically on this website.

Go to <http://www.turnitin.com>

Click on “New User” (located in top right portion of screen).

If you used turnitin.com last year, you can use your original e-mail and password. Select this option to log on and then use our class ID (18765527) and enrollment password (*human2019*).

If you are new to turnitin, then use the directions where it says “new students start here.” Our class ID is 18765527. The enrollment password is *human2019*. Use your first and last name to create your account. Once you are logged on, find the appropriate assignment folder and submit your work when it is in final form.

Click on the icon beneath “submit.” Follow directions to upload your writing.

Type your first name and last name. Give your writing a title. You may only upload your paper once, so only do so when it is in final form. You may view your originality report under the section labeled “your portfolio” (if so allowed by your teacher).
